#### The Evolutionary Roots of Deception and the Unconscious ...

We Lie, David Livingstone Smith, a pro-fessor of philosophy at the University of New England, observes that we have in-herited from our evolutionary

ancestors not only the need to be able to lie convincingly, but also the need to detect others' lies. Better detection skills create the need for better liars. The result is ...

### **Morality and the Irrationality of an Evolutionary Worldview**

and evolution is false. But the truly absurd thing about such evolutionary arguments is that they are contrary to evolution! That is, in an evolutionary worldview why is it wrong to lie—particularly if it benefits our survival value? Now, certainly in a Christian worldview it is wrong to lie, and the Christian has a reason for this: God has

### **On the Verifiability of Evolutionary Psychological ...**

trative examples we have kept our focus on theories that are decidedly social in nature. Scope of This Article: In this article, we attempt to identify one particular set of reasons why people are skeptical of evolutionary theories. That set of reasons focuses on the logic of inference that is applied to specific theories and the sub-

### **Evolution and Ethics 2. What Should We Do?**

We often follow what are considered basic moral rules: don't steal, don't lie, help others when we can. But why do we follow these rules, or any rules understood as "moral rules"? Does evolution explain why? If so, does evolution have implications for which rules we should follow, and whether we genuinely know this?

### **Evolutionary Origins and Functions of the Stress Response**

situations. Such traits lie latent until aroused by the particular circumstances in which they are useful. This means that the evolutionary explanation for such traits cannot be summarized in a single function. Instead, the inducible defenses give an advantage by changing multiple aspects of the body that

### **On the Verifiability of Evolutionary Psychological Theories ...**

Why? We argue that, although sometimes couched in the language of unfalsifiability, the skepticism results primarily from the perception that evolutionary theories are less verifiable than traditional psychological theories. It is more difficult to be convinced of the veracity of an evolutionary psychological

### **Nature, Nurture, and Human Diversity**

Evolutionary Psychology: Understanding Human Nature. Molecular genetics studies why we as organisms are distinct. Evolutionary psychology studies why we as humans are alike. In particular, it studies the evolution of behavior and mind using principles of natural selection. 36. Natural Selection. Natural selection is an evolutionary process through

### **The evolution and psychology of self-deception**

Next we describe different varieties of self-deception and the evidence for these different varieties. We then discuss the interpersonal versus intrapersonal nature of self-deception before considering the levels of consciousness at which the self can be deceived. Finally, we contrast our evolutionary approach to self-deception with current
